

# Connect, Adjust, Play, Forever.

## tara

STI's flagship Simulator.

A 2DOF Motion Simulator that's Plug & Play on Consoles with Lightning fast reaction times and Full Seat, Wheel, Sound and Screen Mition.

Works with any Game compatible with the range of available wheels without the need for a PC to run the Motion System Software or Hardware.

The only true motion sim option for Console gamer in the world.

Enjoy Full Plag & Play with pre Assembled platforms and about 15 minute setup from delivery.

### 01 Connect:

Connect your "tara" motion platform to next generation Console and PC via Wheels standard USB. No additional USB connection or PC required.

### 02 Adjust:

Using pitch & Roll adjustment dials on the platform whilst you play in real time You can control the amount of motion and speed to suit your road, track, rally or F1 experience.

### 03 Play:

Select from any old, current or New games on the horizon without the need for any platform updates...Ever! If the game works with the Wheel & Pedal Set fitted then so will the "tara" with full motion.

### 04 Forever:

Enjoy arcades style motion simulator without any need for licences, downloaded game profiles platform updates or additional Hardware or Software.
